Course Information

This free online Environmental Management diploma program will teach you the definition of sustainability and how the IPAT equation can be applied with various patterns for human consumption. Next you will learn about various climate processes and how they work, as well as about altering the physical properties of the atmosphere by producing greenhouse gases.

Furthermore, in this free distance learning certificate course, you will be learning about biogeochemical cycles like the water, nitrogen and carbon cycles and their interactions with the ecosystem. You will also be introduced to water pollution, types of pollutants and the sources of pollution. Then, you will study the environmental regulations governing waste management, waste management strategies and the history of human energy use. Finally, in this free online diploma program course you will be learning about carbon emissions, combined heat and power and how to build a sustainable energy economy.

This free online course will be of great interest to students, individuals and professionals with an interest in learning about or working in the area of environmental management. Upon successful completion of this online certificate course, you will gain valuable skills and knowledge on waste management, climate change, sustainability as well as pollution. Enroll in this course today and start learning about environmental management.

Modules Studied

Module 1: Introduction to Sustainability: Humanity and the Environment

Module 2: Climate and Global Change

Module 3: Biosphere

Module 4: Physical Resources: Water, Pollution, and Minerals

Module 5: Diploma in Environmental Management - First Assessment

Module 6: Environmental and Resource Economics

Module 7: Modern Environmental Management

Module 8: Sustainability and Environmental Challenges

Module 9: Energy Sources, Carriers and Energy Uses

Module 10: Sustainable Infrastructure

Module 11: Sustainable Energy Practices

Module 12: Diploma in Environmental Management - Second Assessment

Module 13: Course assessment
