Course Information

This advanced, industry-aligned, comprehensive Lean Six Sigma Black Belt diploma program offers an in-depth dive into advanced process improvement and problem-solving methodologies. You'll master the full DMAIC cycle, using tools like hypothesis testing, regression analysis, and control charts, while incorporating Lean techniques to identify and eliminate inefficiencies.

The course bridges theory with application, guiding you through real-world simulations and case-based scenarios. You'll gain **deep expertise in statistical tools and Lean thinking**, learning how to deploy techniques like **hypothesis testing, regression modeling, control charts, and design of experiments (DOE)** to diagnose root causes and optimize outcomes. Through **interactive examples** and explanations, you'll apply these tools to solve high-impact problems in both manufacturing and service environments.

Upon completion, you'll earn CPD-accredited certification, signifying your ability to lead cross-functional improvement initiatives. Whether you're in manufacturing, service, or transactional sectors, these transferable skills will position you as a data-driven decision maker and strategic change leader. Begin your transformation today and unlock measurable impact for your career and organization. Start your journey today and become the driving force behind operational excellence and innovation.

Modules Studied

Module 1: Introduction to Lean Six Sigma Black Belt

Module 2: The Define Phase

Module 3: The Measure Phase

Module 4: The Analyze Phase

Module 5: Lean Six Sigma Black Belt - First Assessment

Module 6: The Improve Phase

Module 7: The Control Phase

Module 8: Lean Six Sigma Black Belt - Second Assessment

Module 9: Course assessment
